Handbook Of The Protists

Synopsis

Published in a modern, user-friendly format this fully revised and updated edition of *The Handbook of Protozoology* (1990) is the resource for those interested in the biology, diversity and evolution of eukaryotic microorganisms and their descendants, exclusive of animals, plants and fungi. With chapters written by leading researchers in the field, the content reflects the present state of knowledge of the cell and genome biology, evolutionary relationships and ecological/medical/economic importance each major group of protists, organized according to current protist systematics as informed by molecular phylogenetics and genomics.

Book Information

Hardcover: 1657 pages

Publisher: Springer; 2nd ed. 2017 edition (August 1, 2017)

Language: English

ISBN-10: 331928147X

ISBN-13: 978-3319281476

Product Dimensions: 4 x 6.2 x 9.2 inches

Shipping Weight: 6.7 pounds (View shipping rates and policies)

Customer Reviews

Dr. John Archibald is Professor of Biochemistry & Molecular Biology at Dalhousie University in Nova Scotia, Canada, and Senior Fellow of the Canadian Institute For Advanced Research. His scientific contributions include serving as Treasurer of the Society for Molecular Biology & Evolution (2009-11) and Associate Editor for various journals, including *Genome Biology & Evolution* and *Journal of Phycology*. He is currently an Editorial Board Member for *Current Biology*, *Eukaryotic Cell*, *BMC Biology*, *Environmental Microbiology*, and *Protist Genomics*. Dr. Archibald's research is focused on the diversity of protists and their organelles. He is the author of more than 100 scientific publications, and author of *One Plus One Equals One: Symbiosis and the Evolution of Complex Life* (Oxford University Press, 2014). Alastair Simpson is a Professor in the Department of Biology at Dalhousie University, Canada, and a Senior Fellow of the Canadian Institute for

Advanced Research. He is the chair of the Systematics and Program Committees of the International Society of Protistologists (ISoP), and a previous winner of ISoP's Hutner Prize for research excellence. He has served as an Associate Editor of the Journal of Eukaryotic Microbiology for 10 years. Dr Simpson has authored >100 scientific publications on the biodiversity, evolutionary history, cell structure and molecular evolution of eukaryotic microbes, with a particular emphasis on free-living protozoa. Dr. Claudio Slamovits is an Assistant Professor in the Department of Biochemistry and Molecular Biology at Dalhousie University in Nova Scotia, Canada. He is also a Fellow of the Canadian Institute For Advanced Research, Program in Integrated Microbial Biodiversity. He is an executive member of the International Society for Evolutionary Protistology and also sits in the Awards committee of the International Society of Protistologists. Dr. Slamovits has received his Ph.D. degree in Buenos Aires, Argentina and conducted postdoctoral training in the University of British Columbia. Since 2009 he leads research in genomics, cell and molecular biology and evolution on a diverse array of protistan lineages.
