Airline Transport Pilot Test Prep 2013: Study & Prepare For The Aircraft Dispatcher And ATP Part 121, 135, Airplane And Helicopter FAA Knowledge Exams (Test Prep Series)

Synopsis

Applicants studying for the Airline Transport Pilot and Aircraft Dispatcher Knowledge Exams will find sample questions for every question in the Federal Aviation Administration (FAA) exam database along with their answers and explanations, in this guide. All of the more than 900 questions from the exam are arranged by subject category and are accompanied by specific study material. Updates are provided to account for FAA test-question changes throughout the publication year via the ASA website or e-mail. Each question is followed by the answer, an explanation of the answer, and a reference and subject code for further study in FAA materials. Regulations, weather and weather services, flight physiology, and aircraft performance are among the subjects covered.

ASA Test Prep Board includes editors Jackie Spanitz, Charles L. Robertson, Cliff Seretan, and Paul Hamilton. Jackie Spanitz is the director of curriculum development at Aviation Supplies & Academics, Inc., and the author of several books, including Guide to the Flight Review. Charles L. Robertson is an associate professor of aerospace at the University of North Dakota. Cliff Seretan holds a Commercial Certificate with an Instrument Rating for Single- and Multi-Engine Land Airplanes and is a CFI for Airplane Land and Instrument. Paul Hamilton is a sport pilot and light-sport aircraft expert, a flight instructor, and the owner of Adventure Productions Co.

This test prep book is time consuming and the layout is confusing. There are many software applications out there that will guarantee you a much better score for a price similar to what was paid for this book. In the end, I did not use it after trying for a month to muck through the problems. They give you answers, but not solutions and practical applications.

Good condition, but without the supplement booklet. The book is useless.

What can you say, This is the only way to prepare for one of these tests. It's a good book.

I found it fundamental to prepare for the airline transport pilot test. Thoroughful and well explained information about each topic. I highly recommend it.

I needed to study on my license. I am not a IT guy and needed paper for my study. Just good enough for my study. I get used. Glaim and little differ from that to use

I got 94 for 3 weeks of studying. Faa is keep changing the questions and out of 80 questions i got abt 10 new questions. Not bad for a book

It is a very usefull manual. It have a lot of information about rules in aviation and a lot of aeronauticals exersises to make our skills better.

For those of you working on that ATP written--good luck. It is a tough one but this book is a great way to improve your score.
