Teach Your Baby Spanish [With Teaching Guide]

Synopsis

The Teach Your Baby series of audio language CDs is specifically developed for babies age three and younger. Stimulate your baby's neural pathways by playing the CD with your baby and saying the words out loud. You will also help the baby attach meaning to the words by following the teaching tips provided. Each of these words and phrases was carefully selected to have meaning to a baby or toddler. For instance, you will not find days of the week or months of the year since they are abstract concepts a young child cannot grasp.

Customer Reviews

I wanted something for my infant to play so she could hear the inflections of another language and I was disappointed. [Baby's First Steps in Spanish \(LL\(R\) Baby's First Steps\)](#) This (Baby's First Steps) is a much better product if you want to hear a lot of a language. We have this in French and I wish we had also gotten it in Spanish. The French (and I'm sure Spanish as well) version has songs, rhymes, and other words to emphasize the different sounds in the language. Teach Your Baby Spanish has someone saying "One", then another saying "Uno" and I could swear the Spanish has an English accent! You don't get the continuous speech or flow of the language and it's really rather annoying to listen to. This would be better for a much older child who is really trying to learn Spanish. I just wanted something to expose my daughter to a few different languages.

My 4 year old listens, repeats and reads along in the car. We like the CD and would recommend it.
