Whips And Whipmaking

Synopsis

Whipmaking is the highest refinement of the art of leather braiding. This revised edition introduces another major category of whips--those made in the Mongol tradition. Braiding details are shown in an extensive selection of photographs that also serve to document the geographic distribution of the whips; their historic use and characteristics are explained in detailed captions. A new chapter describes the evolution of a whip design that became world famous through its association with Hollywood. The whips used by Indiana Jones were all made by the author, David W. Morgan, and the films prompted an immediate revival of interest in whips for performance and sport use.

Customer Reviews

As expected

Very informative Good source for whip making

Excellent book. Very satisfied.

dull

the book gives more of a history then it does on how to make. i was looking for more hands on how to then how they came about

Lots of great information.

The book is more of a history of Whip Making. No useful step by step instructions on actually making whips. The history section is useful in understanding the various types.

GREAT
