Roger L. Greene is a Professor and Associate Director of Clinical Training at Pacific Graduate School of Psychology, Palo Alto University in Palo Alto CA. Dr. Greene has worked in a variety of clinical settings and with different types of patients in his clinical career. He has written a number of texts and articles on the use of the MMPI-2 both clinically and forensically. His books on the MMPI and MMPI-2 have been among the standard references for three decades. Dr. Greene recently received the Bruno Klopfer award from the Society of Personality Assessment for "an outstanding, long-term professional contribution to the field of personality assessment."

One of the Best MMPI-2 Interpretation books in existence. It gives well experienced explanations of various level scores and instructions on how to proceed when you encounter peaks and codes. He interprets shades of grey instead of stark black or white descriptions or putting labels on people.

This book has been very helpful for me when learning this instrument. It is pretty comprehensive, and covers the majority of the things you need to know when using and giving the test.

A must have for psychological/personality testing.

Well written. Most helpful in interpreting MMPI-2 profiles.

An excellent guide that I have used since graduate school.

Good resource

Nice introduction to MMPI-2-RF, providing some in-depth explanations from a well recognized expert who was not closely connected to the instrument's development. Text is well laid out with easy reference tables. Dr. Greene does a nice job with history, and the section on interpreting profiles. It is a text on my desk that is frequently consulted.

Precursory treatment of the MMPI-2-RF.
