Customer Reviews

Wasn't anything like I expected. This could have been place on a blog. 50% of the book was testimonials emails and useless examples not relating to the subject.

Was a good short read but did not get into details. Seemed more like a testament than a helpful guide.

Great book

no hard copy only kindle version- I need to make written note and refer back

Good advice

Good Information- helps with direction for a new industry. Like that there is information on the internet. Recommend to startups. So much more info could have been added
