# Psychiatric-Mental Health Nursing: Scope And Standards Of Practice (American Nurses Association)

## Synopsis

This newly published second edition is the definitive book covering the essentials of psychiatric-mental health (PMH) nursing applicable at all practice levels and settings. It articulates what is expected of all psychiatric-mental health nurses, specifying the who, what, where, when, why and how of their practice. It presents the underlying assumptions and characteristics, addresses matters of environments and settings as well as education and training requirements, and covers key issues and trends and the ethical and conceptual bases of the specialty. Moreover, it specifies the competencies for nursing practice and professional performance of all PMH registered nurses. While this foundational volume is primarily for those directly involved with psychiatric-mental health nursing practice, education and research, other nursing and allied health care providers, researchers and scholars will find value in this content.

## Customer Reviews

This is great for the future practitioner. Very up-to-date, relevant information and definitely contributes to the necessary education of the student.

All of the basic scope of practice stuff for psych nurses and psych NPs. It is actually not as dry reading as I thought that it would be.

Great book to study for certification or to increase knowledge.

Detailed information to refer to.

Good.

Good info.

Great book. Very helpful in new job. Good transaction.

Excellent
