Customer Reviews

Utah has long been known as a rock climber's paradise, but this spectacularly diverse state also plays host to some of the finest ice climbing in North America. Written by long-time Utah ice climber David Black, *Ice Climbing Utah* is the only guide available that covers all of Utah's major ice climbing areas -- as well as many hidden, lesser known treasures. Logan Canyon; Big and Little Cottonwood Canyons; Provo Canyon; Santaquin Canyon; Diamond Fork; Maple Canyon; Joes Valley; all these and many more are included in this first-ever guide to the best ice in Utah. Whether you're seeking classic trade routes or modern, mixed desperates, it's all here. Easy-to-use overview maps and photos are complemented by detailed route descriptions that include information on length, approach time, and descents. Contributions by Greg Lowe and Doug Heinrich offer perspective on Utah ice climbing past and present, and an avalanche safety article by Mike Jenkins and Liz Hebertson completes the package to make *Ice Climbing Utah* an indispensable tool for your next Utah ice adventure.

Not worth the money, unlike other Falcon Guides for climbing, this book has very few of the routes that exist plus very little information on what anchors pre-exist on the routes. There are no route

depictions. However after purchasing this book I found Behive Ice which is much more complete with excelent route depictions, I will be buying it for next season.

I find the book to be compeling even to the beginners. Not only for ice climbers, but hikers during the summer to go to these places and enjoy the beauty and the overwhelming intrige for winter's ice to crystalize.
