Seloc Marine engine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard and sterndrive engines, as well as personal watercraft. Seloc has been the leading source of how-to information for the marine industry since 1974. Designed and written to serve the needs of the professional mechanic, do-it-yourself boat enthusiast, instructor and student, these manuals are based on actual teardowns done by Seloc's editors/authors in our on-site facility. Recognized and used by technical trade schools as well as the

military, every manual provides complete coverage on everything from basic maintenance to engine or drive overhaul; featuring simple to follow, step-by step, illustrated procedures, hundreds of exploded drawings, photographs and tables, maintenance intervals, troubleshooting sections, accurate specifications and extensive wiring diagrams. New on all later manuals is an extensive skill rating system for each procedure which also includes special tool icons.

Very helpful manual. I used it to rebuild the carburetor on a 1988 9.9 hp 4 stroke.

works well; great book.

Great book very good illustrations

Great

Due to the amount of coverage of this product there is very little information regarding anything specifically. Find a more specific book.

Excellent reference to supplement my owner's manual

I love the seloc books. This was a great price and came in fantastic condition.

I was very disappointed by this book. When I wrote to the publisher, they were not very polite and stated that I should not buy their publications as they did not want my money. I would recommend that others, too, not part with their money on Seloc publications. My problems: trying to cover too much, typeface - too small of a font, etc. They should take a look at the Haynes series, much easier to work with in your workshop
