Great song book for sax

I liked because show to me new things . To much informations about jazz

The series of this this book cover all instruments in a jazz ensemble. I bought them to use in my jazz development as there are very good exercises and techniques covered. Having the audio of how what you are playing should sound is a big help to me.

Very useful and had a lot of info on how to play the tenor sax and jazz

My son's sax teacher recommended this book and I was thrilled to find it on for a very good price. It was slightly more worn than I expected from the description, but it was in very adequate shape, with both the CD's included and a great find for my young jazz saxophonist.
