Alternative Treatments For Ruminant Animals

Synopsis

Drawing on decades of veterinary practice, Dr. Paul Dettloff presents a natural, sustainable approach to ruminant health. Copiously illustrated chapters "break down" the animal into its interrelated biological systems: digestive, reproductive, respiratory, circulatory, musculoskeletal and more. Also includes a chapter on nosodes, with vaccination programs for dairy cattle, sheep and goats. An information-packed manual from a renowned vet and educator, suitable for anyone interested in helping ruminants achieve optimal health naturally.

Customer Reviews

Dr. Paul Dettloff was raised on a farm in Wisconsin and graduated from the University of Wisconsin in 1967. Though he began his career as a conventional practitioner, he now specializes in the sustainable and organic/biological treatment of dairy and beef cows, sheep and goats using natural remedies, botanicals, homeopathy and holistic treatment of the farm. He operates Dr. Paul's Lab and is co-founder of Crystal Creek, a firm that provides natural veterinary supplies and remedies. He currently practices in rural Arcadia, Wisconsin, and conducts hands-on workshops around the country on the care of ruminants.

I have found this book to be an invaluable reference for transitioning from conventional cattle treatment to Organic. I would highly recommend this book to anyone considering the transition to organic.

This book is FULL of information! He talks about outdated things and new things and offers insight on so many ailments. This book is a great resource to have on hand. Read it before getting a ruminant and keep it around to refer back to if you ever encounter a problem.

This is an excellent reference book. The writer goes into detail with signs and symptoms of diseases and their alternative treatments. I learned a lot from this book; highly recommend to all who have ruminants.

Bought for a friend and she is getting a lot of good use and info from the book.

We have llamas so could only utilize a portion of the info but good info to have overall. Cattle owners will definitely benefit from this information.

I bought this book for my 13 year old who loves to care for our goats and sheep. She said she really likes the book! I appreciate being able to find information using natural methods, that's hard to find.

Great book. Read it cover to cover. Wanted to make sure I can identify problems with my herd and fix issues as they come up.

This is a good book to refer to when you have a concern about your animals. And Dettloff is only a letter away if you need more specifics. It should be a part of every farmer's library.
