I found the first half of this book to be inspiring, and the second half of this book to be factual and founded on universal truth when it come to success in life and business. However, if you're looking for something you haven't already heard before from someone else, keep walking, and leave *The Answer* for someone who will truly appreciate the book as something totally new and groundbreaking--to them. What Murray and John have done here is take some universal truths about science and business and synthesize it into a book like no one else has before, and came up with something totally different.

While this book will seem redundant for anyone who has been exposed to the Law of Attraction, it moves quickly from familiar theory of quantum physics and how you create your reality into a very useful step-by-step approach to planning a business. I bought the book for this particular reason, as I am in the process of envisioning a new business for myself, and this is exactly what I needed. It is very practical.

Inspirational, a little wordy at times, but motivating and quite thought provoking. I found it well worth the time and effort.

John does a nice job of sharing a step by step methodology of creating a strategic plan for you and your company and executing it. A promotion of his coaching business is threaded throughout the

book

This makes a great companion book to his other "Having It All". The Answer will walk you through starting your own business or improving the one you have, while also giving you much of the basic material from the other book. Read both, and you'll have an excellent foundation in these principles.

Funny, but I listened to this book on CD and got all inspired by its message. So I bought the book. The transitions in print between one section and another don't flow. Same information, but the vocal delivery made a big difference.

Loved the message, the writing style, and the concrete examples used by the authors. They give you something to work with; and they truly keep their audience in mind.

The best concept I gathered from the book is how you can use your thoughts and beliefs to assist in obtaining your dreams. By the time i read this book I no longer needed the business aspect of this book. Even after skipping much of the business information, this book is still very valuable. It changed my life in non-business aspects.
