Customer Reviews

If you are using the Tapestry of Grace curriculum, please be aware that this is not the same version. Your page numbers won't match up and you may find it difficult to use. The version TOG uses has about 350 + pages, so you won't even get the same material.

I used this book in our homeschool as a basic background of European history. It seemed fairly well-written, but we came to recognize so many tired, oft-repeated fallacies that it became a joke. It is hard to trust anything in this book when there are so many inaccuracies (ie: Copernicus' ideas

were considered heretical by the Church; Giordano Bruno was put to death because of his belief in the heliocentric theory; that the Church ever taught that the world was flat.) The book has many alleged quotes, but not once does it give any source for its information. CAUTION: if you are a Catholic, or anyone looking to read the truth, some more reliable source should be used!
