Age Range: 5 - 9 years

Grade Level: Kindergarten - 4

Customer Reviews

“Colorful, informative, and fun, Pop-Up Book of Ships adeptly showcases maritime adventure and lure of the sea, and is a fascinating book for sailors and seamen of all ages.”
~48 North
“From the instant you open the cover of this book, ships from the past and today unfold right before you eyes. Some of the pop-ups are large, while others are small, and one is so big it takes four pages to emerge.”
~Pirates and Privateers Magazine
“The teaming up of these talented and knowledgeable men has produced a book, which is both [as] exciting to look at and play with as it is to read. Yes, kids will love this book, but so will the grown-ups in their lives—perhaps even more so.”
~Sea History --This text refers to an alternate Hardcover edition.

David Hawcock is a skilled paper engineer devoted to the design and production of highly-creative and original pop-up art and three-dimensional paper-engineered concepts. He is the paper engineer for Universe's New York Pop-Up Book, The California Pop-Up Book, The Ancient Egypt Pop-Up

Book, and Pompeii Pop-Up Book. Eric Kentley is a freelance writer and has a PhD in social anthropology. He joined the National Maritime Museum in 1981, and during his sixteen-year tenure held a number of posts including ethnographer, head of ship technology, corporate planner, and head of exhibitions.

Huge hit with 3 and 5 year old grandsons. Not only large pop ups each page, but mini pop ups each page. Would have your hands handle with supervision.

This book is a fascinating book presenting interesting artwork of boats made of thick paper that popup out as the pages are flipped, and some side pages. Issue with book are as follows: a. Center page popupouts do open and close properly as pages are flipped. However side page popouts open and close manually only. There is no mechanism while flipping the book to auto close the popouts. If you forget to close the artwork before flipping page, there is a good chance to do irreversibled damage to artwork. b. Navy ship popup is way to complex, and is designed to rip. c. There are not as many interesting facts or details to go with the book. It does not target an audience, either on construction of ships, or their era, or their usability. That said, this book is the book that keeps my 5 year old very engaged.

My six-year old son said he wanted a "big ship book" for Christmas. The one my husband and I had decided on was out of stock so we chose this one instead & I am glad we did! The pop-ups are very detailed, though heavy compared to the paper so you have to be careful when opening the pages. There is a lot of history to keep our ship-obsessed son enteratined for a while. Overall, I would definitely suggest for anyone interested in the history and making of ships. A fun bonding book for kids & parents!

This book was purchased for a 6-year-old who is fascinated with ships. The pop-outs are amazing. Even the largest pop-out, which is huge, works very well, opening and folding as intended. Information, including a great deal of history, is presented on a wide variety of vessels. Overall, an impressive book.

Impressive pop-ups, especially the battle ship but the pages are thin and flimsy so this may not be suitable for young children unless supervised by an adult. The text is dry but still it is an impressive book for the price. You might also check out Robert Crowther's "Ships" which is part of a

transportation series of pop-up books that are well written and the pop-ups are high quality and made to last.

Beautiful. However would not give to small children since it can tear very easily.

Pop ups are fantastic, I bought this for my sister she is a Liberian in an elementary school. She said the kids always have it out. The detail is amazing.

Excellent pop up book to add to a child's collection!
