# Cells: Experience Life At Its Tiniest (Inquire And Investigate)

## Synopsis

If you look at a piece of a leaf or a drop of saliva through a microscope, what do you see? Cells are the basic building blocks of life and they make up every living thing, from plants to animals, from humans to bacteria! In *Cells: Experience Life at Its Tiniest*, readers ages 12 to 15 investigate cells and learn how they affect our health, reproduction, criminal investigations, and agriculture. Through cell science, scientists have been able to create many things to help society, including seeds that grow better in certain locations, tools that can detect DNA at crime scenes, and immunizations to keep people healthy. To reinforce learning and encourage investigation, hands-on activities include finding and identifying bacteria from pond water and human mouths and building models of different types of cells. Links to online primary sources, videos, and other relevant websites provide a digital learning component that appeals to this age group and promotes further, independent learning while strengthening practical connections to the material. Additional materials include a glossary and a list of current reference works, websites, and Internet resources.

## Book Information

Series: Inquire and Investigate

Paperback: 128 pages

Publisher: Nomad Press (July 11, 2017)

Language: English

ISBN-10: 1619305259

ISBN-13: 978-1619305250

Product Dimensions: 8 x 0.2 x 9.8 inches

Shipping Weight: 9.9 ounces (View shipping rates and policies)
