Roger Priddy's passion for educating children through fun, informative and engaging books has led him to create some of publishing's most enduring and successful non-fiction early learning books. Roger lives in London with his wife and four children, who have been the inspiration behind many of his best publishing ideas.

I love this series, and this is a great book! It counts up to ten, and each page has the corresponding number of a certain animal with two descriptive sentences. I love how creative this series is in using fingerprints and everyday objects to make the animals. We also have the Alphaprints: ABC book. I was pleased to discover that there is only one duplicate animal between the two books. If you already have the ABC book, I would still recommend this one!

When I ordered this, I was unaware of the reason it's called Alpha"prints". All the animals featured in the book are made using a finger print. Each finger print is textured and my 2.5 year old son really enjoys running his fingers over them. It's a LARGE book, which is nice, completely unexpected from the price I paid. Turns out there are other books in the series. I think it's very cute and imaginative that they not only use fingerprints, but also other everyday objects to create the animals. If you look on the cover you'll notice the birds beaks are actually leaves and they're perched on a watermelon. Turtle shells are actually bowls and other such things. It's really cute and I would highly recommend.

My 7 month old loves these books!! I think it's the white background and colorful images plus the texture on each picture. He's sits and stares at them for quite awhile... We have 4 books currently and will keep expanding his collection.

This book is fantastic! Very colorful and text for infant allows you to move along quickly enough that they do not lose interest.

Excellent for my 18m.o.Has tabs across the top of each page to make it easier to turn pages from the top.

So cute! Love the rhyming and the pictures!

Fun board book for toddlers. Well organized and good rhyming sequences.

As with the other Alphaprint books, this has creative, fun, colorful pictures using everyday objects to make up the animals.I like the side margin with the fingerprints for counting.
