Frank Einstein And The BrainTurbo (Frank Einstein Series #3): Book Three

Synopsis

Science fiction meets science fact! Frank Einstein (kid genius, scientist, and inventor) and his best friend, Watson, team up with Klink (a self-assembled artificial intelligence entity) to create the BrainTurbo to power-boost the human body and help their baseball-pitching pal Jane Goodall make the team. But when Klank (a mostly self-assembled and artificial almost intelligence entity) goes missing, they must first rescue their robot pal and stop T. Edison—Frank's classmate and archrival—from stealing their latest invention and using it against them!

Customer Reviews

"The two-color cartoon illustrations are detailed and engaging—facts are educational and presented in an interesting way—it draws readers into the book with its boy-friendly hijinks—This book teaches kids a lot in an accessible, easy-to-read format—"(Kira Moody, Whitmore Public Library, Salt Lake City, UT School Library Journal 2015-03-01)"Scieszka's third joke-filled Frank Einstein adventure jam-packed with sneaky science lessons is perfect for young scientists who may prefer fact to fiction. Biggs' ample tricolor (orange, black, and white in this outing) illustrations extend both the story and the science. Aftermatter broadens the fun with additional science facts, puzzles, and even baseball tips. Halfway through the series, the science and the sly (and slapstick) laughs are still going strong." (Kirkus)"A

perfect page-by-page balance of nerdy science and zany humor will draw readers in and keep them moving." (Booklist) --This text refers to the Hardcover edition.

This is the third book in the Frank Einstein series. All of your favorite characters return, but you don't really have to have read the first two books in order to get up to speed. Frank Einstein is a boy genius inventor, with a human pal, two robot sidekicks, and an evil, (actually mostly just sneaky and mean), boy inventor nemesis. It's humor, action, science, science-fiction, and slapstick, all rolled into one. This time around Frank is trying to help his gal pal, Janegoodall, juice her fastball in order to get ready for baseball try-outs. So, we learn about the human body, including muscles, blood circulation, respiration, and the five senses. All of that comes into play as Frank noodles different ways to improve Janegoodall's performance, so the science and the antics all blend together nicely. When you combine a fine hero, an amusing sidekick, two funny robot sidekicks, a kid villain, and a chimp villain sidekick, you really have a successful recipe. The humor is aimed high and low. There is slapstick and some kid friendly gross stuff. But on the other hand, there are some more sophisticated bits involving puns and sly cultural references. It's always a good sign when there's a little bit of everything for a wide range of young readers, and it seems to me that Scieszka is especially adept at writing middle grade books with wide appeal. So, a nice find, especially for young readers with a scientific bent, and just plain good fun. (Please note that I found this book while browsing the local library's books. I have no connection at all to either the author or the publisher of this book.)

My seven-year-old loves these books! He is an aspiring inventor and scientist. It took him three days to eat up the entire series!

The book was very informative.

I bought this as a gift for an 8-year-old boy and had to go back and buy him all of the Jon Scieszka books because he just devoured them.

My kids (10 and 8) absolutely love this series, and I love all the fascinating science information they are picking up while reading it! We already pre-ordered the next book!

My son loved the book and finished the book in one day. He liked the first book in the series :)

The book arrived a week before the "expected" date and is as described -- great!

great gift. well received.
