Customer Reviews

This laminated foldout Pocket Naturalist guide from the Waterford Press details the major species of North American butterflies and moths for easy identification.

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on

evolution.

This item was perfect for what I wanted!

Good, but general. I needed something more specific to the Northeast.

This is a useful little guide for identifying some of the most common butterflies, moths and caterpillars. It's not a complete reference for all-things-butterfly, but it's a slim, lightweight, laminated pamphlet that's perfect for taking on hikes, especially with younger kids who might just be interested in the names of the more commonly seen butterflies and moths. My 3-year-old daughter has learned enough from this that she can identify and tell the difference between Cabbage White and Mustard White butterflies when we see them flitting around.

To begin, this is not a book but a laminated pamphlet. The idea is good but there is not enough information about the photos listed, such as, the specific areas of North America where they might be found. I also noticed that some of the colors do not appear to be correct an example being the Luna Moth being shown as yellow. While this work does have merit it was not what I expected, especially for the cost.

I am an amateur photographer and I have several pictures of butterflies, etc. but not the names. This has helped considerably.
