Cancer Management In Man: Biological Response Modifiers, Chemotherapy, Antibiotics, Hyperthermia, Supporting Measures (Cancer Growth And Progression)

Synopsis

This volume, the last in this series on cancer growth and progression, is a companion volume to Volume IX and summarizes the current status of plant-derived vinca alkaloids and non-alkaloid natural products. It further explores established and novel approaches for the treatment of patients with malignant neoplasms. The strategies reflected in these volumes are direct extrapolations from the basic science of cancer biology, growth and transplantation as well as hematologic and nutritional support described in earlier volumes of this series. Some port for the cancer patient. Blood pressure in the cancer approaches are directed towards the eradication or modification of the properties of heterogeneous malignant tumor discussed. The last chapter is devoted to the problems of the cells at various stages of tumor progression, while other terminally ill, including evaluations of the burden relatives approaches are directed towards modification of the host and friends of the cancer patient have to bear. antitumor defense systems, e. g. , enhancement of host anti-tumor immune reactivity. It is clear that important advances in the basic science of tumor immune reactivity.
